

📊 Maitei MA methode

Hi all

I want to share my system with you guys, cuz i find so many good thread on this forum. I've tired this system for few days now, and I get quite good result, I think it's quite simple for those begin in forex.

This system is based on 2 EMA and japanese candlestick

16ema

55ema

The slower ema (in purple for me) give the trend

The faster ema (yellow for me) give the signal

Buy signal,

the prices should be above the 55ema for up trend

you should wait the candle close above the 16ema

sell signal,

the prices should be under the 55ema for down trend

you should wait the candle close under the 16ema

you should remember, if you're in up trend (above 55ema) you should only buy

if you're in down tredn (under 55ema) you should only sell

That system work with many timeframe depece of wich currency you want
