

THE POURIA METHOD

period: 85 method: (linear Weight) apply to: (low) color: red

period: 75 method: (linear weight) apply to: (low) color: red

period: 5 method: (exponential) apply to: (close) color: yellow

MACD FAST EMA:15 SLOW EMA: 26 MACD SMA: 1

To use it with 30m and 1H charts

SHORT: when the yellow line crosses the 2 red lines downward and get the confirmation from the MACD it has to be downward too

LONG: when the yellow line crosses the 2 red lines upward and get the confirmation from the MACD it has to be upward too

STOP LOSS: 14 pips the most <--- I doubt if there is any loss

T/P 10 pips to 15 pips..Don't be greedy.
